## Laser therapy treatment for veterinarians is becoming more popular.

Veterinarians equipped with this technology testify of the therapeutic efficacy on many conditions and of the customers' satisfaction given by the treatments.

The most effective treatments for which the most spectacular results have been observed, are:

- ▶ Pain treatment in general
- ▶ Arthritis
- ▶ Gingivostomatitis
- ▶ Promotion of wound healing

Laser therapy can also treat many other problems such as:

- ▶ Ear infection
- ▶ Lower back pain
- ▶ Dental abscesses
- ▶ Granulomas
- ▶ Dermatitis
- ▶ Slow wound healing
- ▶ And many more.

Laser therapy gives the opportunity to provide new services appreciated by customers.

This helps to show the proactive approach of a clinic and to build customer loyalty.

Ensuring to choose the appropriate equipment in terms of budget, will allow an increase in clinic revenue for small investment of time and money.

# Simple and convenient:

- ▶ Portable, quiet and light
- ▶ Touchscreen
- ▶ Pre-set protocols for the different conditions for dogs, cats and horses
- ▶ Options to change protocols or to create new ones
- ▶ Recording of patients' historical data
- ▶ Recording of the personalised treatments for the patients
- ▶ Power: 10 real Watts
- ▶ Flexibility to change frequency to continuous, low, medium or high within the protocol function.
- ▶ Protocols adapted to the coat color

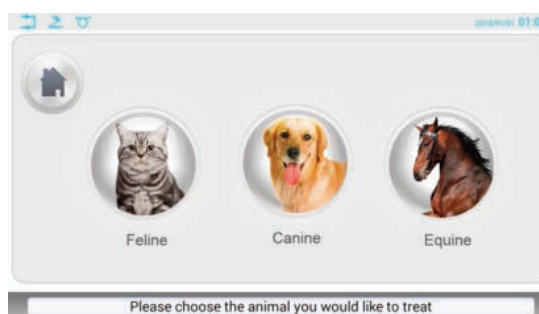

## 2 models available:

- ▶ LT10-2: 2 wavelengths 810 nm and 980 nm
- ▶ LT10-3: 3 wavelengths 640 nm, 810 nm and 980 nm

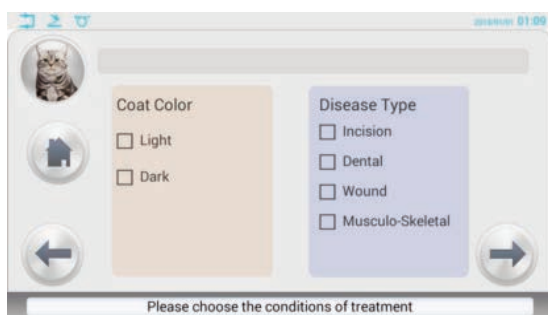

### 1 Intuitive and clear user interface

### 2 Choose the animal you wish to treat.

### 3 Choose the conditions of the treatment

### 4 The laser is ready for emission

## Technical Data:

Laser Classification	IV (4)
Laser type	Solid state, semi conductor laser
Source	Gallium aluminum arsenide laser diode (GaAlAs)
Wavelengths	810 ±10 nm and 980 ±10 nm (model LT10-2) 640 ±10 nm, 810 ±10 nm and 980 ±10 nm (model LT10-3)
Fiber diameter	600 µm
Power	10W
Spot size	> 15 mm
Operation modes	Continuous Wave (CW) or repeat pulse
Aiming Laser Wavelength	650 ±20 nm
Foot/finger Switch Operation	ON / OFF
Weight	2.5 kg
Dimensions	300 x 220 x 200 mm
Power requirement	12V - 5A
Accessories included:	1 handpiece + 2.5 m lg cable 1 large beam applicator 2 pair of safety goggles
Options:	Bio stimulation Tip for Handpiece Large Massage Ball Head for handpiece Additional safety goggles Trolley with castors

### Acute and chronic otitis

Back pain

Anal gland inflammation

Hip dysplasia

Muscle, ligament and tendon injuries

Lick granuloma

Arthritis

Degenerative joint disease

Fractures

Gingivitis, Periodontal disease

### Acute and chronic otitis

Sinusitis

Wounds

Gingivitis, Periodontal disease

Fractures

Lower urinary tract disease
